## Nursing - Academic Skills &amp; Professional Studies

**Critical Thinking and Writing in Nursing**

Fifth Edition (Revised and Updated Edition)

**Bob Price**

Transforming Nursing Practice Series

Critical thinking and writing is central to effective nursing practice. Written specifically for nursing students, this book offers practical guidance on what it means to think critically as a nurse and how to apply this to study and practice. From critically reviewing literature for assessments to evaluating evidence to support decision-making in practice, the book provides a unique framework for developing essential critical skills. Key features A new chapter on 'Writing the Clinical Case Study', along with new guidance on how to become a successful independent learner, advice on managing information overload, and many more updates and enhancements on the previous edition. Each chapter is mapped to the 2018 NMC standards Filled with activities and student case studies demonstrating how to apply critical thinking and reflection in practice Innovative approach that introduces the different levels of critical thinking and reflection required of degree level study

## Nursing - Adult

## Essentials of Nursing Critically Ill Adults

**Samantha Freeman, Colin Steen and Gregory Bleakley**

Critical care nursing is fast-paced and highly technical. You will be caring for people with acute injuries and severe illnesses requiring constant monitoring and detailed care plans. Looking after your patients will require careful, evidence-based clinical judgements that don't lose sight of the person being treated. This textbook has been designed to support you with your first steps towards practicing in critical care environments. It brings together the essential scientific knowledge, theory and evidence base into one place and explains the procedures that you will need to master as your clinical experience grows.

## Nursing - Core Knowledge

## Essentials of Anatomy and Physiology for Nursing Practice

Second Edition

Neal Cook, Andrea Shepherd and Jennifer Boore

The essential guide to anatomy and physiology for nursing students. The new edition of Essentials of Anatomy and Physiology for Nursing Practice brings together text, video, full-colour illustrations, interactive activities, and more, to provide nursing students with a comprehensive introduction to understanding the healthy functioning of the human body. This second edition has been thoroughly updated and includes new videos, improved online support, revised learning activities, and clear explanations that will help nursing students feel confident when learning anatomy and physiology for the first time. Key Features: Students can use their phone or tablet to scan QR codes throughout the book and instantly watch informative animations, mini-tutorials, and other useful videos. Introduces all the essential anatomy and physiology information in a carefully structured way, helping students to steadily build their knowledge and successfully apply it to nursing practice. All content is based around the person-centred nursing framework and a fictional family is used throughout to demonstrate how the biology applies to real people, helping students to apply the A&P knowledge directly to real-life nursing situations. Supported by new and improved online teaching and learning resources, including a teaching guide to the resources, a fully revised testbank, over 250 downloadable figures from the book, and a host of student resources such as multiple-choice questions and over 800 glossary flashcards to help aid revision. Essentials of Anatomy and Physiology for Nursing Practice is essential reading for all nursing students and nursing associate students learning anatomy and physiology for the first time.

## Nursing - Professional Skills

## Beginner's Guide to Reflective Practice in Nursing

Catherine Delves-Yates

What is reflective practice and why is it important? How do I write my first reflection? Learn how to carry out reflective practice quickly and easily with this beginner's guide for nurses. Written for nursing students and registered nurses, this book helps build confidence in writing reflectively by using clear step-by-step guidance, insightful case studies, learning activities, and by addressing commonly asked questions from nurses and nursing students. The book has three sections; the first starts with a simple model to help students practice a first reflection and explains how to use reflection as part of assessed work at university. The second section focuses on reflecting in practice and finding the time to do it in busy work situations. The final section helps students to think more deeply about models and theories of reflection, to develop the skills they will need to pass the final year of their course. Essential reading for any nursing student new to reflective practice or registered nurse wanting to improve their reflective writing skills.

## Key Questions in Healthcare Law and Ethics

Marc Cornock

The perfect textbook for nursing and healthcare students who want a fresh, innovative way to understand how law and ethics relate to their studies, placements, and professional practice. By using a unique format made up of frequently asked questions and corresponding answers, Key Questions in Healthcare covers the what, why, where and how in legal and ethical issues related to healthcare. Its easy-to-use layout helps you quickly find informative yet straightforward answers to over 150 questions, helping you to feel confident in your legal and ethical knowledge, without leaving you overwhelmed or confused. All answers are written in-line with Nursing and Healthcare regulations and its accessible writing style will make you feel like you are talking with a lecturer, instructor, or knowledgeable colleague, rather than a reading a textbook. The book is appropriate for all levels, from healthcare students in the initial stages of their education, to the advanced practitioner who wishes to refresh their knowledge, or maybe learn something new.

## Safeguarding Children and Young People

A Guide for Professionals Working Together

Nick Frost

Safeguarding Children and Young People offers students and practitioners an accessible and multi-disciplinary guide to working together with other professionals to deliver a child-centred and co-ordinated approach to safeguarding, in line with the Working Together to Safeguard Children guidance. Taking a 'whole systems' approach, and offering support on prevention, assessment, intervention, systems, and leadership, the book reflects on recent challenges including contextual abuse, child sexual exploitation and cyber-abuse. The book includes case studies, activities and points for reflection to aid learning and test understanding.

## Student Practice Supervision and Assessment

A Guide for NMC Nurses and Midwives

Second Edition

Jo Lidster and Susan Wakefield

Supporting students poses a significant challenge for nurses and midwives in today's practice. Recent concerns over the fitness to practice of students at the point of registration requires new approaches to practice learning, and the supervision and assessment of future practitioners. Based around the NMC's Standards for Student Supervision and Assessment (2018), this book offers clear, practical advice on how to acquire and develop the knowledge and skills required to supervise and assess a range of students in practice. It explores challenging issues, such as learners in difficulty, and considers how to develop resilience and wellbeing from the perspective of both the student and the supervisor and assessor.

*Hardcover* (9781529733914) | £60.00

## Transition to Professional Nursing Practice

Second Edition

Edited by Rob Burton and Graham Ormrod

Provides final year nursing students with comprehensive guidance on how to make the leap from student to registered nurse, helping them to master the skills needed to progress from supervised to professional practice. Packed with key information, theory and advice, this book covers essential topics such as leadership and management, decision-making, professional development, assessment, law and ethics. It also provides students with an insightful overview of global nursing, exploring the issues of nurse migration and outlining the specific requirements for registering as a nurse in countries outside of the UK. To further support students in their learning, the book includes engaging activities that encourage critical reflection, real-life example scenarios to help with decision-making, and references to the author's personal experiences of professional development.

*Paperback* (9781526444660) | £25.99

*Hardcover* (9781526444653) | £75.00

## Understanding Person-Centred Care for Nursing Associates

First edition

Myles Harris

Understanding Nursing Associate Practice

Understanding how to deliver effective, person-centred care is vital for a future career as a Nursing Associate. In this book, trainee nursing associates are introduced to the principles of person-centred care, with case studies from a variety of healthcare settings and guidance on caring for different patient groups, from acute care to long-term and palliative care. This allows TNAs to see how the theory can be directly applied to their daily practice, regardless of where they work. The book also covers key issues in relation to providing care, such as inclusivity, ethics, legal issues, and health inequalities. Key features:

- Fully mapped to the new NMC standards of proficiency for nursing associates (2018)
- Case studies, activities and other learning features help TNAs understand the theory and apply it to practice.

Designed around a Nursing Associate course, this book demonstrates how person-centred care feeds into each core module. ABOUT THE SERIES: The Understanding Nursing Associate Practice series (UNAP) is a new collection of books uniquely designed to support trainee Nursing Associates throughout their training and into a professional career.

## Research Methods for Nurses and Midwives

Theory and Practice

Second Edition

Merryl Harvey and Lucy Land

With a focus on both understanding and doing, this book first lays the theoretical foundations you need to consume and critique research before showing how to translate this into action when tackling your own project. At a steady pace, it takes you through each step of the research process, offering a wealth of examples at each stage and providing practical support as you undertake your literature review or research project. Ideal for pre- and post-registration nurses and midwives, this second edition: - Equips you with vital research skills like time management - Covers new and updated NMC education standards and recent changes in policy and law - Establishes the relevance of research to everyday practice and inspires you to investigate relevant research questions

## Tribal Development in India

Challenges and Prospects in Tribal Education

Edited by R. R. Patil

Tribal development is one of the most important yet underperforming initiatives of the Indian government. For any effort in this direction to succeed, an effective tribal educational programme is necessary. However, major gaps in the implementation of this programme, along with factors such as corruption and political interference, have contributed to severe malfunctioning and ineffectiveness of the Tribal Ashram schools, a residential school system. It is essential to understand these gaps from policy, design, funding, management, monitoring and evaluation perspectives for ensuring effective service delivery to tribal learners. Tribal Development in India: Challenges and Prospects in Tribal Education is a detailed presentation of the multi-pronged effort towards the educational development of India's tribal population. It includes contributions from academicians and professionals belonging to diverse domains, such as social work, education and administration, and involved in tribal education. The perspectives shared through this book will prove helpful for all stakeholders involved in tribal empowerment through education.

### Clinical Judgement and Decision Making in Nursing

Fourth Edition

**Mooi Standing**

Transforming Nursing Practice Series

Clinical decision-making is a fundamental part of professional nursing care and it is essential that students develop sound judgement and decision-making skills in order to deal confidently with the challenges they will encounter as registered nurses. This book enables pre-registration nursing students to understand, develop and apply these skills in order to practise safely and effectively. The book links theory to realistic student experiences and clinical scenarios to show how to use these skills in practice. Key features: - Fully mapped to the new NMC standards of proficiency for registered nurses (2018) - Contains clinical scenarios illustrating decision making in practice - Activities challenge students and build confidence in their judgement and decision making skills.

Mar-20 | 288 Pages | Learning Matters

### Communication and Interpersonal Skills in Nursing

Fourth Edition

**Alec Grant and Benny Goodman**

Transforming Nursing Practice Series

The new edition of this well regarded book introduces the underpinning theory and concepts required for the development of first class communication and interpersonal skills in nursing. By providing a simple to read overview of the central topics, students are able to quickly gain a solid, evidence-based grounding in the subject. Topics covered include: empathy; building therapeutic relationships; using a variety of communication methods; compassion and dignity; communicating in different environments; and culture and diversity issues. Three new chapters have been added that point readers towards further ways of approaching their communication skills that are less model and technique driven and focusing more on therapeutic considerations, as well as looking at the politics of communication.

## Critical Thinking and Writing in Nursing

Fourth Edition

**Bob Price and Anne Harrington**

Transforming Nursing Practice Series

A clear and practical guide to help students develop critical thinking, writing and reflection skills. It explains what critical thinking is and how students should use it throughout their nursing programme. This new edition also provides content on the reflective practice requirements for revalidation and is mapped to the new 2018 NMC standards. This text provides an innovative new framework that helps students appreciate different levels of critical thinking and reflection required of degree level study. The book demonstrates the transferable nature of critical thinking and reflection from academic contexts to the real practice of nursing. Key features: - Clear and straightforward introduction to critical thinking directly written for nursing students, with chapters relating the subject to specific study and practice contexts - Student examples and scenarios throughout, including running case studies from four nursing students - Each chapter is linked to the new NMC standards of proficiency for registered nurses

## Designing and Managing Programs

An Effectiveness-Based Approach

Fifth Edition

**Peter M. Kettner, Robert M. Moroney and Lawrence L. Martin**

SAGE Sourcebooks for the Human Services

The Fifth Edition of the classic Designing and Managing Programs for human services helps readers grasp the meaning and significance of measuring performance and evaluating outcomes. The authors, all leaders in the field, incorporate the principles of effectiveness-based planning as they address the steps of designing, implementing, and evaluating a human services program at the local agency level. Meaningful examples at every stage of the process—from problem analysis and needs assessment to evaluating effectiveness and calculating costs—enhance reader understanding of how concepts are implemented in the real world.

## Effective Child Protection

Third Edition

**Eileen Munro**

Eileen Munro, author of the seminal Munro Review, returns in this fully revised and updated third edition. With new chapters on 'Child Protection Agencies as Complex Adaptive Systems' and 'How organisations can support more effective practice', this new edition shifts its focus from individual workers to look at the critical role that organisations play in child protection, and how individuals are affected by the complex enterprise of people, processes, cultures and agencies. It remains an essential guide to strengthening analytic and intuitive skills to improve children's safety.

## Evidence-based Practice for Nurses and Healthcare Professionals

Fourth Edition

**Paul Linsley, Ros Kane and Janet H Barker**

In Evidence-based Practice for Nurses and Healthcare, the authors use case studies, examples, and theoretical overviews to guide readers through the concept of evidence-based practice and provides practical guidance on its utilisation in clinical practice. The new 4th edition has been fully updated to reflect contemporary practice, and includes a new chapter on the 'History and Development of Clinical Academics,' which looks at clinical academic careers and the impact and benefits this has for nurses and healthcare professionals on their clinical practice. Written to support nurses at pre and post-registration, the book includes an interdisciplinary focus covering health and social care curricula.

## Evidence-based Practice in Nursing

Fourth Edition

**Peter Ellis**

Transforming Nursing Practice Series

Do your students feel unsure about what exactly constitutes evidence? Would you like them to feel more confident in evaluating evidence and applying it to their practice? Delivering safe, high-quality, patient-centred care is dependent upon nurses having a good understanding of evidence-based practice, and how to apply this successfully. However, for many students engaging with this side of practice is a challenge. This book has been specifically designed to help guide students through the process of identifying, evaluating and applying evidence in nursing practice. Using a variety of learning features, this text will help your students to see how the theory applies to their everyday practice and help them develop the skills they need to confidently use evidence in their clinical decision-making.

## Generalist Social Work Practice

Janice Gasker

Generalist Social Work Practice provides students with the foundational skills and knowledge needed to serve clients across micro, mezzo and macro areas of practice. Author Janice Gasker brings a focus on self-reflection as the first stage in the planned change process and writes with the perspective that we consider work at all levels of practice simultaneously rather than in isolation. In accordance with the 2015 Educational Policy and Accreditation Standards (EPAS) set forth by the Council of Social Work Education (CSWE), the planned change process is presented as dynamic and interactive, providing students with a clear understanding of how each stage of the planned change process can be utilized at any point when serving a client system. The text spotlights the distinctive characteristics of the worker—their values, attitudes, and experiences—that may influence client interaction. The text also includes case studies, collaborative learning exercises, and critical thinking questions to help students apply concepts to practice.

## Health Promotion

Planning & Strategies

Fourth Edition

Jackie Green, Ruth Cross, James Woodall and Keith Tones

Globally recognized as the definitive text on health promotion, this fourth edition becomes ever more useful for public health and health promotion courses around the world. It offers a firm foundation in health promotion before helping you to understand the process of planning, implementing and assessing programmes in the real world. New to the 4th Edition: - A chapter on "Evidence-Based Health Promotion" addressing the development of an evidence base for health promotion. - Expanded coverage of health inequalities, equity and social exclusion - Further discussion of mental health promotion and well-being - Key concepts are now highlighted and explained throughout the book - 'Critical reflection' boxes have been added to help the reader think critically about an issue or approach. The book is supported by online resources, with up to 20 original case studies from around the world, access to full SAGE journal articles, and seminar questions for lecturers.

## Human Growth and Development

Fourth Edition

Chris Beckett and Hilary Taylor

Written for students training for careers in the helping professions, this Fourth Edition covers all the essential topics central to understanding people whether they are clients, service users, patients or pupils. Following the shape of a human life, beginning with birth and ending with death, it combines theoretical concepts and reflective learning to help your students develop an understanding of what makes us grow and change over our lives. The NEW Online Case Study Resource - Tangled Webs Now you and your students can explore key issues and themes raised in the book and develop the skill of linking theory to practice with free access to a new online case study resource. By following the lives of people living in the fictional London Borough of Bexford, this series of interlinked and extended case studies will allow your students to explore complex situations, much as they might do as practitioners in their working lives, and consider what ideas about Human Growth and Development might inform their thinking and practice.

## Leadership and Management in Healthcare

Third Edition

**Neil Gopee and Jo Galloway**

Now in its Third Edition, this best-selling textbook continues to support you on your journey from being an emerging registered healthcare professional through to becoming a competent care manager. Action points, case studies and strong practice guidelines enable you to understand how leadership and management theory applies to the care you deliver in a wide range of care settings. Fully updated throughout, the new edition includes: More case studies and examples from a wide range of care settings and countries. New key topics such as dimensions of leadership, NHS Change Model, transition to registered practitioner and revalidation requirements, emotional intelligence and resilience. A companion website with access to further case studies, journal articles and web links. This book is essential for nursing, health and social care students taking modules on leadership, management and transition to practice in their final year, as well as for newly qualified professionals or those seeking to refresh their skills.

## Leadership in Health Care

Fourth Edition

**Jill Barr and Lesley Dowding**

The Fourth Edition of Leadership in Healthcare responds to the ever-growing importance of leadership to a healthcare professional's role today and includes updated content to reflect the new guidelines set out in the 2018 Nursing and Midwifery Council Standards. The need for leadership in an everyday context is highlighted throughout the book with reference to both theory and practice. There are case studies, practical examples, reflective questions and even anecdotes from the authors' own experience, showing students the potential and application of leadership. There are also activities that enable students to engage with every facet of leadership, as it connects to topics such as team-work, communication, problem-solving, emotional intelligence, critical self-reflection and quality of care.

## Pathophysiology and Pharmacology in Nursing

Second Edition

**Sarah Ashelford, Justine Raynsford and Vanessa Taylor**

Transforming Nursing Practice Series

Pathophysiology and Pharmacology in Nursing has been carefully designed to provide an integrated introduction to both the biology of disease and the therapeutic agents that are used to manage them. It covers the basics of pharmacology, the core pathological concepts of inflammation, infection and cancer, as well as a systems based consideration of the pathophysiology and relevant pharmacology of common disorders. New to the second edition: - All content updated and mapped to the 2018 NMC standards - Two new chapters on 'Mental health conditions' and 'Renal conditions'. The ideal starting point for student nurses to develop a robust, integrated knowledge of human disease and pharmacology, enabling them to provide care that is based on up-to-date knowledge of this important subject.

## Patient Assessment and Care Planning in Nursing

Third Edition

**Peter Ellis, Mooi Standing and Susan Roberts**

Transforming Nursing Practice Series

Nurses of the future need to accurately assess people of all ages, with varying mental and physical problems, across different settings and with changing health needs. This book introduces student nurses and novice practitioners to the assessment process enabling them to identify patient problems in order for solutions to be planned and implemented. The book presents the different stages of the assessment process, taking a holistic and person centred approach throughout. It encourages critical thinking and urges students to consider the social, cultural, psychological and environmental factors as well as the physical symptoms that may be present when making assessments.

## Proposal Writing

### Effective Grantsmanship for Funding

Fifth Edition

**Soraya M. Coley and Cynthia A. Scheinberg**

SAGE Sourcebooks for the Human Services

The updated Fifth Edition of the best-selling Proposal Writing: Effective Grantsmanship for Funding offers a fresh, robust presentation of the basics of program design and proposal writing for community services funding. Authors Soraya M. Coley and Cynthia A. Scheinberg help readers develop the knowledge they need to understand community agencies, identify and describe community needs, identify funding sources, develop a viable program evaluation, prepare a simple line-item budget, and write a compelling need statement. The jargon-free, step-by-step presentation makes the book as useful to students in the university classroom as to first-time grant writers in the nonprofit setting.

## Succeeding in Literature Reviews and Research Project Plans for Nursing Students

Fourth Edition

**Graham R. Williamson and Andrew Whittaker**

Transforming Nursing Practice Series

Now in its fourth edition and thoroughly updated to ensure all content is mapped to the new 2018 NMC standards, this book is a practical and readable guide to undertaking a research project plan or a literature review for final year assessment. The book guides readers from start to finish, beginning with choosing a nursing topic and developing questions about it, then accessing and critically reviewing research literature, considering ethical issues, proposing research where applicable, and finally, writing up and completing the literature review or research proposal. The authors also explore how to translate evidence into practice and how this can improve day to day decision-making, as well as feeding into assessments.

Nov-19 | 248 Pages | Learning Matters

*Paperback* (9781526476289) | £22.99

## The Practice of Research in Social Work

Fourth Edition

Rafael J. Engel and Russell K. Schutt

The Fourth Edition of The Practice of Research in Social Work introduces an integrated set of techniques for evaluating research and practice problems as well as conducting studies. Evidence-based practice comes alive through illustrations of actual social work research. Updated with new examples, the latest research, and expanded material on technology and qualitative methods, this popular text helps readers achieve the 2015 EPAS core competencies essential for social work practice..

Mar-16 | 496 Pages | SAGE Publications, Inc

*Paperback* (9781506304267) | £115.00

## Understanding Anatomy and Physiology in Nursing

First Edition

John Knight, Yamni Nigam and Jayne Cutter

Transforming Nursing Practice Series

Covering all the key aspects of anatomy and physiology that nursing students need to know, this book condenses vast amounts of scientific information into short, concise, and easily accessible chapters. From an overview of cells, blood, and the major organ systems, through to the key developmental stages, genetics and ageing, this book introduces all the vital anatomy and physiology information that aspiring nurses will need to learn. Throughout the book, case studies link core principles of anatomy and physiology to realistic scenarios commonly encountered by nurses in clinical practice, helping students apply this knowledge to their everyday working life. Key features - Mapped to the new NMC standards of proficiency for registered nurses (2018) - Case studies, activities and other learning features help students translate the theory to practice - Provides revision guidance and strategies for tackling exams and assessments

May-20 | 400 Pages | Learning Matters

*Paperback* (9781526474544) | £19.99

*Hardcover* (9781526474551) | £60.00

## Understanding Research for Nursing Students

Fourth Edition

**Peter Ellis**

Transforming Nursing Practice Series

If you're learning about research for the first time, or grappling with an essay or final year project, this is the nursing research book you're looking for. Using plain language and case studies that relate research directly to every-day nursing situations, the author guides you through the central concepts you need to know to truly understand research in nursing. Key features - Each chapter is linked to the new NMC standards of proficiency for registered nurses - Seven concise chapters that quickly answer the most common questions about research - Activities, scenarios and case studies bring the theory to life and show why research is so important to nursing - Nine podcasts to bring topics from the book to life
